

K-Love radio station serves our residents and local community by offering a positive, upbeat, healthy alternative to other radio stations. I have raised 3 teenagers that are now young adults. K-Love was a radio station that we left on all of the time and had tuned on in our vehicle. I observed their attitudes when they listened to negative lyrics & non inspirational type radio stations and the results were NOT healthy or good. I believe what goes in the mind comes out. K-Love and radio stations like these are vital to helping raise a healthy, clear-minded, stable youngster. We must have easy and constant access to these types of radio stations. It is in our public interest to keep radio stations like K-Love priority because they are vital to our communities. Suicides have been stopped, people have changed their negative course of life through having access to radio stations like K-Love. To implement LPFM would jeopardize the good that K-love stations and others like them have been able to accomplish for the good of the community. Other stations just do not impart a good moral, good citizen, good samaritan type of influence which is needed for a good healthy, well working and safe society.
